

Amendments to the Specification:

Please replace the fourth full paragraph on page 10 with the following amended paragraph:

FIG 9C is a graphic representation of a plan view of FIGs 9, 9A and 9B illustrating a geometric pattern of LEDs R,Y and B mounted within a panel LEDP. The pattern consists of substantially equilateral groupings of LEDs, typically LG1, LG2 ~~[[adn]]~~ and LG3, which in the case of using three colors of LEDS (for instance red, yellow and blue) each color is surrounded by the other two colors alternately forming a hexagon H-1.

Please replace the following paragraph which was added after the fourth paragraph on page 10, with the following amended paragraph:

FIG 9D is a cutaway isometric diagram of a typical lens configuration MRL surrounding LED as illustrated in FIG 9A. Lens MRL is comprised of radial lens portions MRLL and MRLU each canted in section each projecting a canted radial beam CRL and CRU, respectively. The respective angles A1 and A2 of the central axis ~~[[CPE]]~~ CPU and CPL are other than 90 degrees to the central axis OA of lens configuration MRL. Exit surface EX of lens portions MRLL and MRLU can be parabolic or spherical. (See U.S. Patent No. 6,361,191.)
